

Introduction to the world trolleybus list

In the tables, all the trolleybus systems known so far were listed, test systems, systems for military purposes and goods traffic systems were included.

Among the trolleybus systems installed and not put into operation, those are stated which at least were partially set up, however, never put into service.

In the columns – Eröffnung / opening date – and - Stilllegung /closing date – where no entries were made, the exact date is unknown. By the closing date, the author understands the day on which the last trolleybus was withdrawn officially from service. In many transportation agencies trolleybuses continued to be in service for a short time, however, in general, this was not documented.

In the column – Bemerkungen / Remakes -, other (old) names and spelling of towns were listed and the special characteristic of the trolleybus systems.

Transcribing the names of the town from the Cyrillic, Chinese and Korean, the German transcription was used.

It was tried to take into consideration the present political national frontiers and the names of the towns.

As the trolleybus is subject to political changes like other means of transportation, a list will never be perfect.

All time are Remarks welcome: <mailto:MSchin488@aol.com>

This are all amateur informations!

Abbreviations:

I.B. Trolleybussystem in service

N.I.B Trolleybussystem was built and never in service

Bibliography:

Very big, please contacted to the author!

Thank You for all informations from enthusiasts!
